

# T-Q | T-\*Q STARLINE System Passives

## Base Product

## 1.2 GHz System RF Passives

- Support DOCSIS® 3.1 expanded bandwidth up to 1218 MHz
- Improve network performance with signal conditioning plug-ins
- Compatible with 1.2 GHz FFT-\*Q Series Taps
- Compatible with 1.2 GHz Regal RMT2120 Series Taps

The CommScope T-\*Q series RF Tap Signal Conditioning Plug-ins allow for signal conditioning with the CommScope 1.2 GHz FFT-\*Q and 1.2 GHz Regal® RMT2120 series taps. These optional plug-ins are field-configurable modules that include cable equalizers, return path attenuators, and cable simulators. These plug-ins allow for drop signal conditioning without affecting the main feederline path. The conditioning plug-in that is selected affects all ports equally.

## Product Classification

**Regional Availability** Asia | Australia/New Zealand | EMEA | Latin America | North America

**Product Type** RF passive

**Product Series** T-CS | T-EQ | T-RPA

## Electrical Specifications

**Operating Frequency Band** 5 – 1218 MHz
