

VTRANSXKC-11W-3

Dual-polarized output transition for HX, USX & SHPX4 antennas, 10.00 - 11.70 GHz, UBR100 flanges

Product Classification

Product Type Output transition kit

General Specifications

Polarization Dual

Electrical Specifications

Operating Frequency Band 10.000 – 11.700 GHz

Packaging and Weights

Included Flange hardware kit | OMT hardware kit | OMT transition

* Footnotes

Operating Frequency Band Bands correspond with CCIR recommendations or common allocations used throughout the world. Other ranges can be accommodated on special order.
